

SCHOOL OF BUSINESS

Energy and Sustainability Studies Track

The M.B.A. in Energy and Sustainability Studies track is designed for individuals who wish to focus on issues of sustainability, corporate social responsibility, and energy concerns in their organizations, communities, and in society. Students enrolling in this track will develop a master's level understanding of business leadership, energy issues, and the triple bottom line—planet, people and profits - approach to business through a combination of theory and practice.

This program prepares graduates to work in the energy industries or to take charge of energy and sustainability portfolios in their organizations and their communities.

This degree consists of 13 courses and awards 39 credits. Course work involves the study of new business models, corporate social responsibility, sustainability, and natural resource issues through the lens of energy production, distribution, and consumption. Energy efficiency, renewable energy, and traditional energy sources are studied in detail. This approach permits application of energy and sustainability concepts in concrete, quantitative, and practical terms and provides students with the tools to apply this knowledge in their businesses, communities, and private lives.

ESS Advisory Board

The Energy and Sustainability Studies program is supported by an advisory board made up of distinguished industry professionals. The goal of the board is to provide input to the program curriculum to ensure both its currency and relevancy as well as to provide networking opportunities for students.
