

General and Liberal Education and the Pierce Promise

- Knowledge of Human Cultures and the Physical and Natural World
- Intellectual and Practical Skills
- Personal and Social Responsibility
- Integrative and Applied Learning

The faculty teaching general education courses focus their efforts on delivering course content while also training the students in the aligned learning outcomes. These learning outcomes are measured and assessed in terms of actual learning achieved. The Pierce Promise focuses attention on the educational process, inviting faculty to be more innovative and student-centered in their methods, and students to be more active and engaged in their academic development.

At Franklin Pierce, liberal education is understood to be the charge of the whole curriculum, with the major and minor programs working in partnership with general education to promote achievement of the GLE Learning Outcomes (LO).

General education requirements offer a breadth of encounters with the identified learning outcomes not possible in any single field, while establishing a secure academic grounding for the higher accomplishments of the disciplines, and creating a secure foundation for a rewarding professional life.

General education requirements are defined in terms of the GLE LOs. Students will successfully encounter a LO by passing the course in which it is addressed. There are several general education courses required in the first year. There are also a range of more exploratory offerings, based in academic disciplines, which are chosen on an elective basis.

Liberal Education & the Pierce Promise is literally a promise to our students: Commit yourself to your Franklin Pierce education, and you will achieve what you need to advance confidently toward your future.

General and Liberal Education (GLE)

The General and Liberal Education (GLE) experience begins with three required first-year courses. The First Year Inquiry seminar and First Year Composition are coordinated to strengthen the most essential skills needed for college success.

- **First Year Inquiry Seminar (FYI):** teaches Inquiry & Analysis, Information Literacy, and Career Exploration (for traditional students) or

- **Career Image, Planning and Management:** teaches Applied Learning and Career Exploration (for online students)
- **First Year Composition:** improves Critical Reading and Written Communication
- **Second-Year Composition:** addresses Written Communication and Oral Communication

Beyond these first-year courses, students take courses organized across five Knowledge and Understanding (K&U) areas. Within a K&U area students are required to select courses with different prefixes.

Students may meet their Natural Science K&U with the same prefix. Embedded within each GLE courses are 13 learning outcomes that Franklin Pierce students will pursue. Courses designated for general education will typically address 2-3 GLE LOs. Arts and Design courses involve Applied Learning, Creative Thinking, Oral Communication, and Problem Solving.

- Humanities courses incorporate Critical Thinking, Critical Reading, Intercultural Knowledge, and Written Communication.
- Mathematics courses include Quantitative Literacy and Problem Solving.
- Natural Science courses embrace Inquiry and Analysis, Critical Thinking, Technology Literacy, and Problem Solving.
- Social Sciences courses contain Inquiry and Analysis, Critical Thinking, Critical Reading, and Information Literacy

In addition to the 13 learning outcomes embedded in the Knowledge and Understanding areas, many courses, extracurricular activities, guest lectures, and workshops on campus offer students opportunities for:

- Career Exploration
- Civic Knowledge and Engagement
- Digital Literacy
- Ethical Reasoning
- Experiential Learning
- Financial Literacy
- Teamwork

Recommended GLE Curriculum Guide for Online Students

The requirements for completing the GLE curriculum is the same for online and Rindge students, the one exception being that online students take GLE103 Career Image, Planning and Management in the place of GLE101 First Year Inquiry. Many students in the online program will have some GLE requirements met by transfer credits. Students wishing to transfer credits toward their Natural Science GLE requirement are not required to match GLE-approved Natural Science courses. All Natural Science courses with a lab component will be considered. Online students should be aware of any outstanding GLE requirements and work intentionally to complete them while also completing major and other requirements for graduation.

Recommended GLE Curriculum Guide for Traditional Students

The following are some very general guidelines for completing GLE course requirements. For more specific guidance, consult the Recommended Curriculum Guides in this Catalog for major programs. These guides give more specific recommendations for how GLE courses fit in the course sequence of a major program.

First Year

First Year Inquiry Seminar (Fall Semester)

First Year Composition I (Fall Semester)

Mathematics (for students not majoring or minoring in the natural sciences)

or

Lab science I (Fall Semester) and Lab science II (Spring Semester) (for students majoring or minoring in the natural sciences)

One other K&U-based GLE course in AD, HM, or SS; two if schedule allows

Sophomore Year

Second-Year Composition (Spring Semester)

Lab science I (Fall Semester) and Lab science II (Spring Semester) (for students who did not take science in their first year)

or

Mathematics (for students who did not take math in their first year)

Two to four GLE courses in AD, HM, and/or SS K&U areas

Junior Year

One to four GLE courses in AD, HM, and/or SS K&U areas, depending on need

Senior Year

Completion of any outstanding GLE requirements
